

การตรวจสอบความละเอียดของเครื่องคำนวณ

การตรวจสอบความละเอียดของเครื่องคำนวณนี้ ถูกตรวจสอบขึ้นด้วยสมการดังนี้

$$\arcsin (\arccos (\arctan (\tan (\cos (\sin (9)))))))$$

สมการดังกล่าวนี้ ถูกคิดค้นโดย Mike Sebastain (2000-2007)สามารถใช้ได้กับเครื่องคำนวณที่ผลิตขึ้นมาใช้งานกันแพร่หลาย ในปัจจุบันบางรุ่นที่กล่าวมานี้ ไม่สามารถหามาใช้งานได้แล้ว เนื่องจากไม่มีการผลิต จะมีก็เพียงรุ่นใหม่ ๆ ที่เข้ามาแทนที่อย่างมากมาย

Notes:

^a The generic 56 function scientific calculator is sold under numerous brand names in several distinct case styles. For example, this calculator is sold as the Radio Shack EC-4038, DATEXX DS-700, DigiTech ATC-517 and ATC-828, Tozai ATC-828, Victor 930, Sentry CA565, LeWorld 250, and Canon F-502 (billed as having 136 functions).

^b Polynomial approximations used to compute trigonometric functions.

^c I believe this is an APF Mark 8501 manufactured for Radio Shack.

^d A model of the HP Spice series.

^e A model of the HP Voyager series.

^f A model of the HP Pioneer series.

^g The last digit is indeed different from that of more common (later?) versions of the Casio fx-7000G.

^h The Omron SR-10 produces a different result depending on whether or not the display format switch is in the EXP (1.2199423E01) or FLT (14.541191) position.¹

- ⁱ The Citizen SRP-320G, Durabrand 828 (older SC-828 version), and other related low-end graphing calculators do not compute arcsin in degrees, even when in degrees mode, as part of a formula such as the forensics formula. The arcsin step of the forensics algorithm must be computed as "sin⁻¹ Ans".
- ^j I believe this device uses true floating point for its transcendental calculations, instead of the traditional BCD (Binary Coded Decimal) of most calculators.
- ^k The Sharp PC-1001 produces a different result depending on whether or not the display format switch is in the EXP (9.0000606185) or FLOAT (9.0039554305) position.³⁷
- ^m Unexplained different results from different contributors.
- ⁿ There are two versions of the Durabrand 828, the older SC-828 version and the newer SC-1376 version.
